## **USB Specifics**

The idea behind using on a USB Flash Drive is to make it easily portable with all of the application and data files stored on the Flash Drive. Easily take between home and office, and always be up to date.

### **Benefits**

- Minimal to no installation or setup required, just copy to and run from the USB Flash Drive. Can be copied to the computer's hard drive in a folder and run from there as well!
- Data between Windows, MacOS and Linux stay in sync.
- Extremetly easy to backup
- Allows privacy when used on shared or company computers since the application and data are only on the USB Drive that you take with you.
- Your copy will be registered to you and provided as a digital download that you can put on as many USB Drives as you like.
- Free 14 Day Trial available.
